## **CORPORATE ASSOCIATION OF THE FILTRATION SOCIETY**

### ***JOIN NOW FOR YOUR COMPANY TO RECEIVE THE BENEFITS OF SOCIETY MEMBERSHIP***

Corporate Association of the Filtration Society is a way for industrial, commercial and research organisations and universities to become involved with the many activities of the Society which has been advancing and disseminating knowledge in the design and use of filtration and separation techniques in industry and other walks of life since 1964. It has provided its members in some thirty countries of the world with ready access to a wide range of filtration and separation information and research through the organisation of conferences, regular publications and networking opportunities.

The annual subscription entitles a Corporate Associate of the Society to receive:

- Unique opportunities to network and develop business links with like-minded members, associates and others concerned with the supply and use of filtration and separation equipment.
- A ¼ page colour advertisement in an issue of the official journal of The Filtration Society - *FILTRATION* (published by Filtration Solutions) - one of the most widely circulated journals concerned with all aspects of filtration.
- Three copies of each issue of *FILTRATION*, published quarterly. This journal includes the latest Society news from the UK and America, programmes of events, industry editorials and updates, people profiles, and articles which detail the results of both industrial and academic research that is generally at the preliminary stage of development. *FILTRATION* contains new and original research papers from around the world that cover the broad field of filtration, separation, clarification, dust control and related processes.
- Reduced registration fees for up to three company employees at Filtration Society organised and co-sponsored meetings.
- Inclusion on the Society web site of a hotlink (using the Company logo) to a designated company homepage.
- The entitlement to use a Society logo designed solely for use by Corporate Associates.
- 50% discount off the purchase price of the magazine "Filtration and Separation" from the publisher Elsevier.
- 12½% discount on buying "The Dictionary of Filtration and Separation" from the publisher Filtration Solutions.
- The Society will publish editorials on items of industrial news free of charge in *FILTRATION*.

The Society is a Registered Charity and is a not-for-profit organisation. Corporate Associates are encouraged to communicate their views on all matters to the Society Council and to participate in all affairs of the Society. The Corporate Associate will nominate a contact person who will be regarded as a member of The Filtration Society.
