

REGISTRATION Please register me for:

FILTER TESTING AND STANDARDS; 28th October 2008, Chester, UK

Name: Affiliation:

Address:

Post Code:

Tel: Fax:

Email:

CONFERENCE:

- £140 Non Member
- £100 Member
- £70 Student (evidence required)

EXHIBITION:

- £295 Corporate Associate Includes entry for 2 persons
- £495 Non Corporates Includes entry for 1 person + corporate association of the society for 1 year
- £595 Non Corporates Includes entry for 2 people + corporate association of the society for 1 year

Please send information on membership of the society:

- Student Membership
- Individual Membership
- Corporate Membership

PAYMENT METHOD:

Cheque enclosed for: £ (Made payable to: The Filtration Society)

Credit card - Please charge my Visa/Mastercard: £

--	--	--	--	--	--	--	--	--	--

Cardholder name: Expiry: (mm/yy)

Signature:

Please invoice

Please send this form WITH PAYMENT if applicable to:

The Filtration Society, 19 Clyst Valley Road, Clyst St. Mary, Exeter, Devon, EX5 1DD, UK

Fax: +44 (0) 1530 223124 until 31st July 2008, then +44 (0) 1392 874398

Charges include VAT, lunch and refreshments. A VAT invoice will be issued on receipt of payment. The Society regrets that it cannot refund the registration fee if registrants cancel within 2 weeks of the date of the meeting. Prior to that a 20% cancellation fee will apply.

Chester is approximately 35 minutes by car from Liverpool and Manchester airports and is easily accessed via the main motorway system.

London is around 2 hours away by train.

The **FILTRATION**
Society

presents

**1 Day
International
Conference & Exhibition**

**FILTER TESTING
AND
STANDARDS**

28th October 2008

in the historic city of
Chester, England

AGM will follow the Conference

sponsored by

**Whitehouse
Scientific**

THE CONFERENCE

The Filter Testing series of conferences takes place approximately every 2 years and is one of the most popular in The Filtration Society's calendar. The one-day format is attractive to many because it does not intrude too much into the busy schedule of today's scientist and engineer.

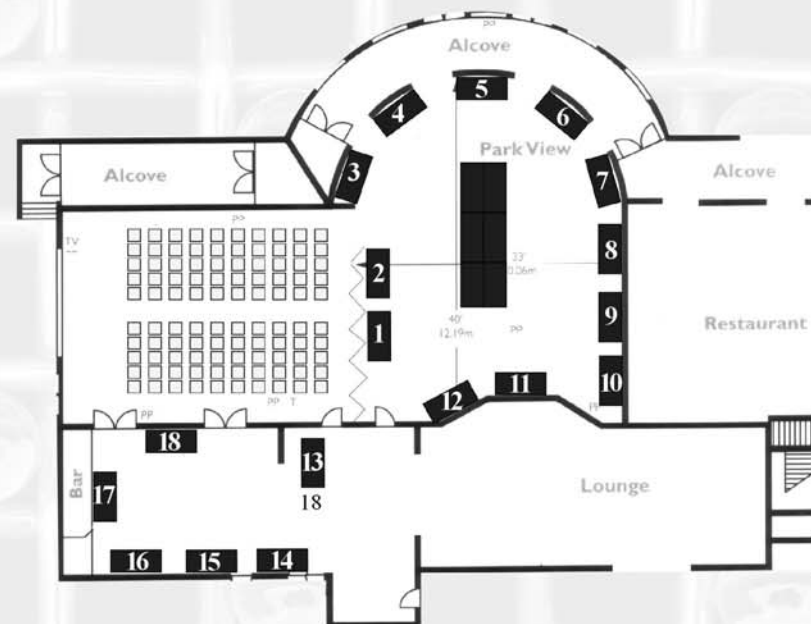

The presentations during the day are carefully designed to maximise the scientific and technical data provided for the delegates. They will be introduced to the latest pioneering research on the measurement and performance of filter media, not just in process optimisation but in compliance to the latest standards.

Time	Title	Speaker
09:30	Latest Evolutions of Liquid Filter and Filtration Standard Test Methods	Christophe Peuchot, IFTS
10:00	Recent Developments in ISO Standards in the Field of Compressed Air Analysis and Characterising Compressed Air Filter Performance	Stephen Smith, Domnick Hunter
10:30	Analytical Instruments in Challenge Testing Filters: Particle Size Analysis - Fact or Fiction?	Keith Brocklehurst, LGC
11:00	Coffee and Exhibition break	
11:30	Poster session	
12:30	Lunch and exhibition break	
13:30	Filter Media Pore Size Comparison Between Porometry And Glass Bead Challenge Testing	Graham Rideal, Whitehouse Scientific
14:30	A New High Resolution Method of Measuring Efficiency and Pore Sizes of Membranes	Hiran Vegad, Analytik Ltd
15:00	Tea and Exhibition Break	
15:30	Testing Methods Designed to Comply with the Latest Air Filter Standards	Hans-Georg Houn, TSI
16:00	Evaluation of Filter Test Rigs for Fractional Efficiency Measurements According to Filter Test Standards	Sven Schutz, Palas
16:30	Conference close	
16:30	AGM of The Filtration Society - an open meeting	

A very important and popular format of the conference will be the poster session, where the delegates will receive a 5 minute 'burst' of information on a wide range of filter testing techniques. Competition for space is always fierce and those expressing an interest so far include Benelux Scientific and Topas (new Porometers), Tecan (calibration standards for Porometers), PMT (particle counters), Anton Paar (Filter Zeta Potential measurements), Clear Edge and Filter Ability Ltd (Practical filter testing).

All delegates will receive bound notes of the conference and have the opportunity of publishing their lectures in the journal FILTRATION.

THE EXHIBITION

The multi-functional Park Suite enables close integration between the lecture theatre, exhibition areas, refreshments and a lounge for networking. Delegates will therefore be in an ideal situation for discussions with colleagues, presenters and exhibitors.

Those giving PowerPoint poster presentations will also have the opportunity of displaying a hard copy of their work on notice boards provided.

Approximately 100 highly focused international delegates are expected. Although mostly from Europe they have in the past also come from the USA, the African continent and Asia.

The event will be well publicised through several co-sponsorships with leading international magazines.

The number of display tables will be limited to about 20. On the experience of previous conferences, it is recommended that prospective exhibitors apply early to secure a position.
